

**NOTIFICATION OF
NIGHT TIME FLOW ISOLATION TESTING**

Dear Residents:

The Bridgeville Borough has contracted with Gateway Engineers and C&K Industrial Services, Inc. for testing in public sanitary sewers that may be near your home. This testing will help to determine if groundwater and/or rainwater is entering the sanitary sewer system. In order to make this determination, trained professionals from C&K Industrial Services, Inc. will perform night time flow isolation testing in sanitary sewer manholes between the hours of 12:00AM and 5:00AM. This testing does not require you to be home but it may require that our contractors come onto or through your property in order to reach a pre-determined testing sanitary manhole. Each person contracted with the Municipality will be wearing high visibility clothing and will have identification on them at all times. This work does not require any access into your home and therefore no requests should be made to enter your home at any time. Testing time near your home can range from a few minutes up to fifteen (15) minutes.

Work is expected to commence the week of May 17, 2010.

This work is being conducted due to a Pennsylvania Department of Environmental Protection (PaDEP) consent order. Should you have any questions or require further information please contact the Borough Manager and/or the Chief of Police at (412) 221- 6012.

Thank you very much for your cooperation while we complete this required testing.

Sincerely,
Lori Collins
Borough Manager
